FORT COLLINS

One Water is the future of the water industry. Many benefits are realized when the barriers traditionally separating water, wastewater, stormwater, and reuse are broken down. One Water is a guiding principle

Challenges & Opportunities

“Overall, the best place in the world to live. We strive for excellence in all areas. Fort Collins has been a community that believes there’s no standing still—you’re either moving forward or falling behind. Fort Collins chooses to move forward.”

- West Fort Collins Water District

CORE VALUES

Livability

Community

Sustainability

Principle ENV 6: Manage water resources in a manner that enhances and protects water quality, supply and reliability.

POLICY ENV 6.1 - WATER RESOURCE PLANNING

Partner and collaborate with water service providers to ensure adequate, safe and reliable water supplies in accordance with the Water Supply and Demand Management Policy. To the extent feasible, coordinate on supply and storage development and demand modeling.

POLICY ENV 6.2 - WATER CONSERVATION AND EFFICIENCY

Continue and enhance water conservation, efficiency and education programs in accordance with the City's Water Efficiency Plan. Consider new and revised land-use and site-planning standards to reduce water use in both new and redevelopment projects. Where possible, coordinate on programs and services to create consistent experiences for users regardless of their location and water service provider.

POLICY ENV 6.3 - DROUGHTS AND VULNERABILITY

Develop drought and vulnerability planning that takes into consideration the future impacts of climate change; potential demand changes from increased urban and multifamily developments; and other hazards and vulnerabilities, such as disruption of supplies due to wildfires. Partner and collaborate with water service providers in the GMA.

CITY PLAN
PLANNING OUR FUTURE. TOGETHER.

Continuous Outdoor Water Use

Your irrigation system has been running continuously since 9:00 PM on Wednesday, June 30, 2021.

[Investigate possible leak »](#)

Continuous use is often an indication of a running toilet or leaky irrigation valve.

ESTIMATED
GALLONS

270

ESTIMATED
DURATION

27
hours

ESTIMATED
RATE

10 gph

What's next?

1. Check for leaks.

[Here's how »](#)

2. Tell us what you found

[I found a leak »](#)

[This was not a leak »](#)

This notification is a courtesy of Fort Collins Utilities. Please check your plumbing for potential leaks. View your own daily and hourly water use online to check if the continuous water use is still occurring through the MyWater portal at fcgov.com/mywater.

Utilities' Leak Contact

Phone: 970-221-6808

Email: leaks@fcgov.com

We've been out of town, and we're so thankful for this notification. We were able to send our landlord over to check out the place, who discovered standing water from the hot water heater that burst in our basement.

Leak Found - 80 Gallons Per Hour
Confirmed as Hot Water Tank

A guest had hung a towel on the knob for the faucet which left the faucet running. It's been turned off. Thank you for the notification. It's a great service to be notified by email!!

Not A Leak - 250 Gallons Per Hour
Confirmed as Left a Hose or Faucet Running
